

POE-1DC 12VDC, 2 Amp PoE Switch

Technical Specification

Part Number	POE-1DC	
POE – Power Specification	Power: 15.4W(IEEE802.3af)	The input voltage: 44-57V
	The Output Voltage: DC 12V	Current Input: 12 - 35 Watts
Electrical Interface Specification	Input: 1 input RJ45 port	Output: 1 output RJ45 port; 1 DC output port
	Data transmitting rate: 10/100Mbps	Data transmitting distance: 100M
Protocol Standard	IEEE 802.3i 10BASE-T; IEEE 802.3u 10BASE-TX;	
	IEEE 802.3x Flow Control; IEEE 802.3af Power over Ethernet	
LED Indicator light	POE input power indicator light, DC output power indicator light	
Environment Specification	Operating temperature: 0-50°C; operating humidity: 85%, no condensation	
Power / Amps out of this product are controlled by the wattage of the network hardware and line due to distance and cable. "Watts /12 volts" provides output load the hardware. Note: It is important to perform a load calculation of devices connected.		

Features:

- International standard 48v, IEEE802.3AT/AF standard
- Support 44v-57v wide voltage design
- RJ45 network output, 12v 2amp Output DC
- More compatible, high power, super stable, intelligent.
- The intelligent automatic recognition is transmitted by the power of the PPD and the distance of 140-180 meters
