Sicunet's Cloud-based Management Platform

Our cloud-based management platform delivers complete control over your building security from anywhere, accessible via any smart or mobile device. True Cloud enables seamless management of single or multiple sites from a unified platform. Purpose-built for the cloud, the system provides automatic updates, secure backups, unmatched scalability, and seamless third-party integrations. Leveraging AWS Cloud services, it incorporates the latest security scanning protocols and enables rapid remote deployment of updates.

Our core focus: simplicity, ease of use, and the convergence of multiple technologies within a single, unified platform.

True Cloud

- Management of the system is in the cloud
- Database is automatically backed via the cloud
- Automatic updates
- Interconnect multiple sites into one database or partition the sites maintain central management
- Unlimited Users with edit auditing
- Two Factor authentication
- Single Sign on
- Push Notifications
- Unlimited scaling
- System Status
- Enterprise- grade
- Mobile App Management
- Mobile Credentials

The screenshot shows the Sicunet login page. At the top is the Sicunet logo with the tagline 'ACCESS CONTROL SOLUTIONS'. Below the logo are two input fields: 'Enter email or username' and 'Enter password'. There is a 'Forgot your password?' link and a 'Remember me' checkbox. A blue 'Login' button is positioned below the password field. Underneath the login button is a link: 'Don't have an account? Register'. Below this is a horizontal line with 'OR' in the center. At the bottom are three social login buttons: 'Continue with Google', 'Continue with Microsoft', and 'Continue with Apple'.

System maintains 100% functionality If the platform is off line.
